

Newly Designed & made in USA

High Speed 144-shot Transmitter

Features

- Fires up to 144 cues in semi-automatic (single-shot sequential), fully-automatic (machine gun), and random fire modes. Optional frequencies of 315 and 433 MHz are available. Radio range is ½ mile.
- Box is environmentally sealed and may be operated safely in heavy dust and rainfall conditions.
- Powered by two AA batteries with 4 month continuous on-time life.
- LED indicators show battery charge, next cue to be fired, channel number, armed/safe status, and selected firing mode.
- Channel and cue range configurations can be preset from the keypad by the user. Configuration is retained in non-volatile memory even when power is disconnected.
- Both 315 MHz and 418 MHz models are FCC and IC certified.

High Speed 144 Shot Multi-mode Transmitter, Model XMTR12B / XMTR12C
